

Digital Citizenship Week

OSES Students participated in Digital Citizenship week. We had a wonderful time learning about our Digital Footprint and staying safe online. Kindergarten, First, and Second grade learned about Mizzle the Mouse and Electra the Elephant and how not to share too much information online. Third grade created a footprint in Microsoft Word and typed a paragraph about "Why having a good digital footprint is important. "

Fourth and Fifth grade have been working on their Digital Passport for a couple weeks. Digital Passport is a program that teaches students how to be good digital citizens through games. The students can earn online badges that ensure they understand the concept of being safe online.
