

## RoboRaptors won the Champions Award

We are so happy to let you know that the **RoboRaptors won the Champions Award** today at the FLL Robotics competition.

This is the highest award given to any team at these competitions. They competed against 24 other teams and ended up being ranked the best overall for all of the 4 categories of core values, project, robot design and total robot points.

We are so proud of the students as there was a lot of hard work, dedication, and huge time commitment to get us to this amazing accomplishment. Please join us in congratulating them.
