

ORLANDO SCIENCE SCHOOLS MATH QUALIFIERS

Orlando Science Schools placed 2nd during the October Qualifying Round of mathleague.org competitions. These were held at Lake Whitney Elementary School on Saturday, October 7th. Congratulations to all mathletes who competed, and we wish them luck at the upcoming rounds.

A special thanks to Ms. Calabrese!!

Mathleague.org sponsors many elementary school contests that are held throughout the school year. The contests are structured in such a way that students will find the tests good preparation for other elementary and middle school math contests. Top-scoring students, at qualifying meets held throughout the year, will be invited to compete at their state's championship in late April or early May, and winners of the state championships will be invited to the national championship in June.

Please see also below for Orlando Science Schools qualifiers to next level:
