

Silk Road Cart Construction

Mrs. Silvares' class learned all about the ancient Silk Road, where it was located and what it was used for. The students' favorite part was talking about all of the dangers and perils that the travelers could face. After the lesson, the students worked in groups to design, sketch, and build a cart that could have been used to travel the Silk Road. They also had to come up with a removeable container to keep their goods safe.
