

## Pi Day

This week students celebrated Pi Day (03-14-18) on the Technology Campus with many fun educational activities. Students were challenged with reciting as many digits as they could remember of our well known 3.14 number friend. Those who brought white shirts were entered into a shirt decorating contest, and then were able to wear their creations around school. Pi Day quizzes were taken by the students, and projects were displayed for all to see. Brain teasers, mind puzzles, and other hands-on activities were also available to all participants. With consent and donations, from our wonderful families, we were able to also have a feast full of dessert pies to wrap up the festivities.
