

## Science Fair

Our school Science Fair was a big hit! Our middle school students have worked very hard researching various topics the first semester and were excited to display their final projects. Science classes came by to view their fellow classmates projects and also judge for themselves who they think should move on to the County Science Fair! The Ying Expo Science Fair is February 14th at the Central Florida Fairgrounds and they are looking for judges! Teachers and parents are invited to come out and judge projects from all over Orange County. It is a great opportunity to see what kind of effort and creativity makes a great project.
