

A Fantasy Parade

By: Animation and Theme Park Design Club (K-2)

Ms. Haines' animation and theme park design club has been working for weeks to create a fantasy parade inspired by some favorite characters and movies! Students spent 9 weeks working in groups to bring their designs to life. First, students split themselves into teams, based on their favorite movies. Then, they had to sketch a float concept that would work with the characters. After that, they decided on a color scheme to enhance their sketches. Finally, they painted and assembled their floats! Once the paint dried, it was time to engineer wheels and set the parade in motion!

Please watch our parade here:
