

Naviance is a college and career readiness platform that our high schools use to help students explore career paths, research colleges and universities, and plan for their futures. Naviance includes tools for career assessments, college searches, and application tracking.

To access [Naviance](#), students should create an account through their high school guidance counselor or college and career center. They can then use the platform to explore potential career paths, research colleges and universities, and track their progress in the college application process.
